A self motivated and ambitious professional with a passion for web development. A team player who thrives on creating engaging creative solutions and the ability to work with minimum of supervision. A quick learner who takes responsibility for his own personal development upgrading his skills to stay at the cutting edge of web development. Has the ability to absorb new ideas and can communicate clearly and effectively. Currently looking for an opportunity to join an enthusiastic team within which its staff can prosper and grow.

Projects

- **Quote Generator**

Created a webpage that uses AJAX to request a random quote from a local JSON file and displays the quote to the screen.

- **Weather App**

A webpage that allows a user to enter their location and receive information about the local weather. Built using NodeJS frameworks Handlebars, Axios, Express and Open Weather API.

- **Rest API**

Engineered a REST API using NodeJS in order to better understand CRUD operations. The API allows reggae artists to be added, deleted, updated and retrieved from MongoDB.

- **Reggae Web App**

Developed a website that uses Angular4 and the REST API previously mentioned to retrieve data that is entered and displays to the web page. Allows a user to view detailed information about the band.

- **Beer Web App**

Created a website that uses Angular4, Bootstrap, SASS, and Punk API to allow users to view a full list of beers or get information for a randomly selected beer.
